

Научном већу
Института техничких наука САНУ
Кнез Михайлова 35/IV
11000 Београд

Предмет: МОЛБА ЗА ПОКРЕТАЊЕ ПОСТУПКА ЗА ИЗБОР У ЗВАЊЕ

Молим Научно веће Института техничких наука САНУ, да у складу са Правилником о поступку и начину вредновања, и квантитативном исказивању научно-истраживачких резултата истраживача (Службени Гласник РС, бр. 24/2016, 21/2017 и 38/2017) покрене поступак мог избора у звање **виши научни сарадник**.

За чланове комисије за припрему извештаја Научном већу предлажем:

1. Проф. др Владимира Павловића, редовног професора Польопривреденог факултета Универзитета у Београду
2. Академика Антонија Ђорђевића, редовног члана САНУ, редовног професора Електротехничког факултета Универзитета у Београду,
3. Др Смиљу Марковић, научног саветника Института техничких наука САНУ

У прилогу достављам:

1. Биографију,
2. Библиографију,
3. Извештај о цитирањости,
4. Доказе о квалитативним условима,
5. Одлуку о стицању научног звања.

У Београду, 04. 05. 2020.

Подносилац молбе:

др Сузана Филиповић

научни сарадник ИТН САНУ

Стручна биографија

Филиповић (дев. Стевановић) Сузана рођена је 18. 02. 1981. године у Шапцу. Основну и средњу школу завршила је у Шапцу. Дипломирала је на Факултету за физичку хемију Универзитета у Београду, 2006. године, са просечном оценом 8,67, са темом „Утицај механичке активације на Раманове спектре BaTiO_3 “, чиме је стекла стручно звање дипломирани физикохемичар. Исте године уписала је мастер студије на Факултету за физичку хемију и завршила их 2007. године са темом завршног мастер рада „Промена специфичне површине порозног ZnO током синтеровања“. Школске 2009/10. године уписала је докторске академске студије на Факултету техничких наука у Чачку, студијски програм Електротехничко и рачунарско инжењерство, модул Савремени материјали и технологије у електротехници. Завршила је студије са просечном оценом 9,75 и одбранила докторску дисертацију под називом „Утицај механичке активације на својства $\text{MgO}-\text{TiO}_2$ електрокерамике“, 30. 01. 2015. године. Изабрана је у звање научни сарадник 30. 09. 2015. године одлуком бр. 660-01-00011/192 Министарства просвете, науке и технолошког развоја.

Запослена је у Институту техничких наука САНУ од 01. 12. 2006. године. Као научни сарадник учествовала је у реализацији пројекта који је финансирало Министарство просвете, науке и технолошког развоја Републике Србије и билатералне сарадње са Републиком Француском. Аутор и коаутор је више од 40 радова у научним часописима, као и више од 40 презентација на међународним и домаћим конференцијама. На основу података из Web of Science и Scopus индексних база цитираност радова је 250, хетероцитата 132 и h-index 8, на дан 19. 03. 2020.

Ужа области интересовања су јој испитивање утицаја механичке активације на синтезу и синтеровање електрокерамика, методе карактеризације материјала, наноструктурни материјали, мултифункционални материјали, композитни материјали и оксидна керамика.

Добитник је награде за најбољу усмену презентацију на 4. конгресу за микроскопију одржаном 2010. године у Београду, коју додељује Српско друштво за микроскопију, за рад под називом *Structural analyses of sintered MT and BZT ceramics*, као и награде за најбољи рад у секцији додељене 2016. године на конференцији ЕТРАН за рад под називом *Measurement of permittivity of solid and liquid dielectrics in coaxial chambers*.

Рецензент је часописа *Science of Sintering*, *Journal of Alloys and Compounds*, *Journal of the Serbian Chemical Society*, *International Journal of Mechanical Sciences*, *Advanced Powder Technology*. Члан је организационог одбора међународне конференције Српског керамичког друштва *Advanced ceramics and application: New Frontiers in Multifuncional Material Science and Processing* од 2012. године.

Члан је уредништва међународног часописа *Science of Sintering*.

Члан је Српског керамичког друштва и Америчког керамичког друштва.

Библиографија

Радови публиковани пре покретања поступка избора у претходно звање, до фебруара 2015. године

Укупно ΣM52= 2x1,5=3

Услов за стицање звања

Сабирање бодова по категоријама

- Поглавље у тематском зборнику међународног значаја

M14 = 1x4 = 4 Поглавље у тематском зборнику међународног значаја

ΣM10 = (M14) 4 = 4

- Радови објављени у научним часописима међународног значаја, научна критика; уређивање часописа (M20):

M21a = 4x10=40/(после нормирања ΣM21a=32,91) Рад у међународном часопису изузетних вредности

M21 = 5x8=40/(после нормирања ΣM21=32,82) Врхунски међународни часопис

M22 = 3x5=15/(после нормирања ΣM22=13,57) Истакнути међународни часопис

M23 = 4x3=12/(после нормирања ΣM23=9,78) Међународни часопис

M29a = 1 x 1,5 = 1,5 на годишњем нивоу: а) Уређивање међународног часописа

ΣM20 = (M21a) 40/32,91 + (M21) 40/32,82 + (M22) 15/13,57 + (M23)

12/9,78 = 107/89,08

- Зборници са међународних научних скупова (M30):

M32 = 1x1,5 = 1,5 Предавање по позиву са међународног скупа штампано у изводу

M34 = 18x0,5 = 9/(после нормирања ΣM34=8,41) Саопштење са међународног скупа штампано у изводу

ΣM30 = (M32) 1,5 + (M34) 9/8,41 = 10,5/ 9,91

- Радови у часописима националног значаја (M50):

M52 = 2x1,5 = 3 Рад у часопису националног значаја

ΣM50 = (M52) 3 = 3

Врста и квантификација научних резултата др Сузане Филиповић насталих након избора у звање научни сарадник:

Ознака групе	Број радова	Вредност индикатора	Укупна вредност
M14	1	4	4
M21a	4	10	40/32,92*
M21	5	8	40/32,82*
M22	3	5	15/13,57*
M23	4	3	12/9,79*
M29a	1	1,5	1,5
M32	1	1,5	1,5
M34	18	0,5	9/8,41*
M52	2	1,5	3
Укупно			126/107,51*

ZnO

ABSTRACT

Commercially available ZnO powder was mechanically activated in a planetary ball mill. In order to investigate the specific surface area, pore volume and microstructure of non-activated and mechanically activated ZnO powders the authors performed N₂ physisorption, SEM and TEM. Crystallite size and lattice microstrain were analyzed by X-ray diffraction method. XRD patterns indicate that peak intensities are getting lower and expand with activation time. The reduction in crystallite size and increasing of lattice microstrain with prolonged milling time were determined applying the Rietveld's method. The difference between non-activated and the activated powder has been also observed by X-ray photoelectron spectroscopy (XPS). XPS is used for investigating the chemical bonding of ZnO powder by analyzing the energy of photoelectrons. The lattice vibration spectra were obtained using Raman spectroscopy. In Raman spectra some changes along with atypical resonant scattering were noticed, which were caused by mechanical activation.

1. Introduction

Due to its wide direct band gap (3.37 eV) and large excitation binding energy at room temperature, ZnO is a very good semiconductor material and an important ceramic material for application in gas sensors, catalysis, solar cells and transducers [1–6]. With its wurtzite structure improved ZnO characteristics, such as smaller and more uniformed particle size, are desirable properties for its application in multilayer ceramic capacitors and varistor, as well [7]. It is well known that the structural, morphological, and electronic properties of ZnO particles depend not only on the specific crystal structure, composition, and morphology of the oxide particles, but also on defect in their structure [8]. A nanosized powder with uniformed particle size distribution and controlled particle morphology is highly desirable.

There are many methods which can produce this type of powder such as microemulsions, colloidsynthesis routes, sol-gel methods and spray pyrolysis, ion implantation, laser ablation etc. for the

preparation of various nanostructures and homogenization [1]. Among these methods, to produce nanocrystalline powder and to improve the functional properties, mechanical activation has been employed, due to its simplicity, shortened time of sample preparation and low-cost.

Mechanical activation processes are used to modify the properties of materials, to enhance the reactivity of materials and to produce advanced materials etc. The reactivity of materials is dependent on different parameters such as activation time (duration time of milling process of powder) and type of energy mill. Also the different atmosphere, where the milling process is performed, has a big influence on reactivity of the material. Mechanical activation by grinding, as a method for modifying the physical and chemical properties of powder materials, is often used in powder technology [9,10]. Specific changes that occur during grinding have a great influence on final properties of the obtained material, also improving their specific application. Mechanical activation by grinding requires a few processes and mainly occurs in four stages. In the first stage there is a destruction of material than in the second stage it can be observed a formation of a new surface on the material which is destroyed. Next stage is fine grinding and finally

Допис о руковођењу поројектима и учешћу у пројектним задацима

др Сузана Филиповић

Овим потврђујем да је у оквиру пројекта 172057 ОИ – Усмерена синтеза, структура и својства мултифункционалних материјала, финансираног од стране Министарства просвете, науке и технолошког развоја Републике Србије од 2011. до 2019. године, а којим сам руководио, др Сузана Филиповић руководила подпројектним задатком: Проучавање параметара синтезе и консолидације на функционална својства електрокерамичких материјала. Такође, у оквиру пројекта француско-српске билатералне сарадње “Интелигентни еко-материјали и нанокомпозити“ под бројем 4510339/2016/09/03, а у периоду 2016-2017.год, руководила је истраживањима везаним за оптимизацију параметара синтезе нанокомпозита на бази прекерамичких полимера.

Др Сузана Филиповић је учесник у међународној сарадњи са Централним Универзитетом у Чешкој Републици чији је руководилац prof. dr. Karel Maca, (Central European Institute of Technology, Brno University of Technology, Brno, Czech Republic). Ова сарадња обухвата истраживања из области савремених метода синтетирања, из које је пристекло неколико радова категорија M21a, M21, M22 и саопштења на међународним скуповима.

Др Сузана Филиповић учествује и у међународној сарадњи са Центром за истраживање материјала Универзитета у Мисурију (prof. dr. William Fahrenholtz, Missouri University of Science and Technology, USA). У оквиру ове сарадње испитује се утицај параметара синтезе и консолидације на добијање ултра густе спинелне керамике магнезијум алумината. На основу ове сарадње остварени су значајни резултати који су публиковани у више међународних радова.

Др Сузана Филиповић је иницијатор сарадње са Институтом за физику, пољске Академије наука (dr hab. Lukasz Kilanski, Institute of Physics, Polish Academy of Sciences, Warsaw, Poland). У оквиру сарадње испитују се магнетна својства мултиферионичних материјала. Из ове сарадње произтекло је неколико радова који су у процесу рецензије у међународним часописима.

Science of SINTERING

Science of SINTERING, the Journal of the International Institute for the Science of Sintering is published four times a year.

The purpose of the Journal is to provide a suitable medium for the publication of papers on theoretical and experimental studies, which can contribute to the better understanding of the behaviour of powders and similar materials during consolidation processes. Emphasis is laid on those aspects of advanced materials that are concerned with the thermodynamics, kinetics and mechanism of sintering and related processes.

In accordance with the significance of disperse materials for the sintering technology, papers dealing with the question of ultradisperse powders, tribochemical activation and catalysis are also published.

Института техничких наука САНУ

Потврда

Овим се потврђује да је др Сузана Филиповић, научни сарадник Института техничких наука САНУ, члан Српског Керамичког Друштва (Serbian Ceramic Society) од 2009. године, које наставља традицију Југословенског Керамичког Друштва од 1997. године. Српско Керамичко Друштво је члан Светске Керамичке Федерације (ICF) и придружени члан Америчког Керамичког Друштва (Endorsed society of American Ceramic Society), а такође у свом раду има пуну подршку Европске академије наука и уметности у Салцбургу.

Одлуком Управног одбора СКД од 6. Априла 2011. године, др Сузана Филиповић је изабрана за Председника секције СКД „Млади истраживачи“. Члан организационо научног одбора међународних конференција *Advanced ceramics and Application* организованих од 2012. до 2019. године у Београду.

У Београду, март 2020.

Српско керамичко друштво
Председник

Проф. др Вojислав Митић
Научни саветник ИТН САНУ
Редовни професор Електронског факултета
Универзитета у Нишу
Члан Европске академије наука и уметности
Члан Светске Керамичке Академије

Dear Suzana Filipovic,

Thank you for the review of the manuscript titled "Improvement of Dielectric Breakdown Strength in $\text{Sr}_{0.7}\text{Bi}_{0.2}\text{TiO}_3$ – Modified $\text{Sr}_{0.7}\text{Ba}_{0.3}\text{Nb}_2\text{O}_6$ Ceramics" that was submitted to the NMCI2019. We appreciate your effort and expertise contributed to reviewing, without which it would be impossible to maintain the high standards of peer-reviewed journals.

Best regards,

Daisy Zheng

Title: A novel cheap, one-step and facile synthesis of hierarchical TiO₂ nanotubes as fast electron transport channels for highly efficient dye-sensitized solar cells
Advanced Powder Technology

Dear Dr. Suzana Filipovic,

Thank you for taking the time to review the above-referenced manuscript. You can access your comments and the decision letter when it becomes available.

To access your comments and the decision letter, please do the following:

1. Go to this URL: <https://ees.elsevier.com/apt/>
2. Enter your login details
3. Click [Reviewer Login]

Thank you again for sharing your time and expertise.

If you have not yet activated or completed your 30 days of access to Scopus and ScienceDirect, you can still access them via this link:

http://scopees.elsevier.com/ees_login.asp?journalacronym=APT&username=suzana.filipovic@itn.sanu.ac.rs

You can use your EES password to access Scopus and ScienceDirect via the URL above. You can save your 30 days access period, but access will expire 6 months after you accepted to review.

Yours sincerely,

Yongsheng Han
Editor
Advanced Powder Technology

Dear Dr Suzana Filipović,

Thank you very much for your thorough reviewing the manuscript "Fenton process combined with precipitation for the removal of Direct Blue 1 dye: A new approach," for Journal of the Serbian Chemical Society. We are very grateful for your time and appreciate your contribution to the quality of the paper that we publish.

Title: Thermomechanical modelling of ceramic pressing and subsequent sintering
Journal: International Journal of Mechanical Sciences

Dear Filipovic,

Thank you for your review for the above-referenced manuscript. I greatly appreciate the commitment of your time and expertise. Without the dedication of reviewers like you, it would be impossible to manage an efficient peer review process and maintain the high standards necessary for a successful journal.

When a final decision has been reached regarding this manuscript you will be able to view this decision, as well as reviews submitted by any other reviewers, at: http://www.evise.com/evise/faces/pages/navigation NavController.jspx?JRNL_ACR=SUBMIT2IJMS. You can also access your review comments here, at any time.

I hope that you will consider International Journal of Mechanical Sciences as a potential journal for your own publications in the future.

Kind regards,

K. Davey
Editor-in-Chief
International Journal of Mechanical Sciences

**МИНИСТАРСТВО ПРОСВЕТЕ,
НАУКЕ И ТЕХНОЛОШКОГ РАЗВОЈА**
Комисија за стицање научних звања

Број:660-01-00011/192

30.09.2015. године

Б е о г р а д

На основу члана 22. става 2. члана 70. став 5. Закона о научноистраживачкој делатности ("Службени гласник Републике Србије", број 110/05 и 50/06 – исправка и 18/10), члана 2. става 1. и 2. тачке 1 – 4.(прилози) и члана 38. Правилника о поступку и начину вредновања и квантитативном исказивању научноистраживачких резултата истраживача ("Службени гласник Републике Србије", број 38/08) и захтева који је поднео

Институт техничких наука САНУ у Београду

Комисија за стицање научних звања на седници одржаној 30.09.2015. године, донела је

**ОДЛУКУ
О СТИЦАЊУ НАУЧНОГ ЗВАЊА**

Др Сузана Филиповић

стиче научно звање

Научни сарадник

у области природно-математичких наука - хемија

O B R A Z L O J E N I E

Институт техничких наука САНУ у Београду

утврдио је предлог број 090/3 од 25.03.2015. године на седници Научног већа Института и поднео захтев Комисији за стицање научних звања број 099/1 од 27.03.2015. године за доношење одлуке о испуњености услова за стицање научног звања ***Научни сарадник***.

Комисија за стицање научних звања је по претходно прибављеном позитивном мишљењу Матичног научног одбора за хемију на седници одржаној 30.09.2015. године разматрала захтев и утврдила да именована испуњава услове из члана 70. став 5. Закона о научноистраживачкој делатности ("Службени гласник Републике Србије", број 110/05 и 50/06 – исправка и 18/10), члана 2. става 1. и 2. тачке 1 – 4.(прилози) и члана 38. Правилника о поступку и начину вредновања и квантитативном исказивању научноистраживачких резултата истраживача ("Службени гласник Републике Србије", број 38/08) за стицање научног звања ***Научни сарадник***, па је одлучила као у изреци ове одлуке.

Доношењем ове одлуке именована стиче сва права која јој на основу ње по закону припадају.

Одлуку доставити подносиоцу захтева, именованој и архиви Министарства просвете, науке и технолошког развоја у Београду.

ПРЕДСЕДНИК КОМИСИЈЕ
